## FLAVOUR SYSTEM

### Flavour Infusion by the Drop!

**Infuse icing, dessert fillings  
and baked treats with drops of  
unique flavour concentrates.**

Blend unexpected, yet perfectly  
paired flavours by the drop to create  
delicious combinations.

With the Treatology™ flavour system,  
you use fewer drops to flavour more,  
without compromising the colour or  
consistency of your icing, filling or  
cake batter.

## ICING COLOURS

Produce deep, rich colour with just a small amount using this fast-mixing gel. Exclusive concentrated gel formula helps decorators achieve the exact shade desired without changing icing consistency. 28 g [1 oz.] single pots. Certified Kosher. Pack size: 6.

\*Note: Large amounts of these colours may affect icing taste. Use No-Taste Red for large areas of red on a cake. When using Black, start with chocolate icing to limit the amount of colour needed.

### 8 Colours Icing Colour Set

Contains Ivory, Golden Yellow, Pink, Red-Red, Violet, Royal Blue, Leaf Green and Black. 28 g [1.0 oz.] pots. Set/8. Pack size: 3. 03-610

## HOW TO COLOUR ICING

Begin with white icing and add Wilton Icing Colour a little at a time until you achieve the shade you desire.

1. Dip toothpick in to the icing colour.
  2. Swirl it into the icing.
  3. Blend icing well with palette knife. Repeat this process, adding colour a little at a time, until you achieve the desired shade. Always use a new toothpick each time you add more colour to avoid getting icing into your pot of icing colour.
- Hints:**
- Begin with white icing. For dark brown or black buttercream icing, begin with chocolate icing to reduce the amount of colour needed. To cover large areas of red, use Wilton No-Taste Red Icing Colour.
  - Icing colours intensify in buttercream about 1 to 2 hours after mixing. Royal icing requires more colour than buttercream to achieve the same intensity.
  - To maintain colour consistency, always mix enough of each icing colour to complete your cake, including flowers and borders. It can be difficult to duplicate the exact shade of any colour.
