

FOODSERVICE BROCHURE 2017

[www.dartproductseurope.com](http://www.dartproductseurope.com)

# Welcome to **Dart Products Europe,** a leading manufacturer of high performance single-use foodservice products.

Customers choose Dart for our commitment to setting the **industry standard of excellence** with a broad range of products for the foodservice, retail/consumer, and food packaging industries.

Our pledge to customer satisfaction does not end with the sale. Dart has forged many long-standing business partnerships with the distributor community through ongoing service and support levels that are second to none in the industry. From top to bottom, Dart stacks up as the proven leader in providing quality, service, and convenience to foodservice markets worldwide.

Our two UK based manufacturing facilities use materials such as PET, rPET, paper and EPS foam, and have the international resources to supply products worldwide,

as well as in your local area.

In order to ensure that we provide our customers with consistent product quality and a dependable source of supply, Dart manufactures most of its own production equipment and raw materials, and then turn those raw materials into finished products.

**Our dedicated team looks forward to working with you.**

DART PRODUCTS EUROPE

# WHERE WE ARE

Where this **truck logo** is displayed the product is also **available floor-loaded** from our **Cradley Heath** site, all other products are only **available palletised** from our **Huntingdon** site. Please contact our Customer Service Department for further information.

# ENVIRONMENTAL SOLUTIONS

ENVIRONMENTAL SOLUTIONS

Our Bare® by Solo® range of sustainable single-use foodservice products uses a variety of materials to provide sustainable solutions. Bare® by Solo® isn't just a product line, it's a philosophy focused on bringing alternative resources for the environment.

# SOLO<sup>®</sup> PLA-COATED PAPER HOT CUPS

These paper hot cups feature a coating of annually harvested PLA, one more step for sustainability.

## Commercially Compostable\*

The lining is made from polylactic acid, a plant based resin making the cup commercially compostable

## Sidewall

Made from 100% virgin Solid Bleached Sulfate Paperboard

## Custom Printing Available

Enhances custom printing and branding, turning the cup into a walking advertisement

Meets ASTM D6868 standard

## Voice of the Customer

"For a stylish, reliable and eco-conscious paper cup, I needn't look further than the PLA-coated paper hot cups from Dart Products Europe's Bare<sup>®</sup> range."

<b>Material</b>	Cup: Paper with PLA (plant based resin) lining Lid: Polystyrene
<b>Sizes</b>	8–16oz (237–473ml)
<b>Colour / Design Options</b>	Bare® by Solo® (Special prints also available)
<b>Lid Options</b>	Traveler™ – Black/White Lock Back – White Vented – White

PLA (Polylactic Acid) is a plant based resin commonly derived from **corn starch**.

PLA is an ideal coating for paper cups as it is a **fully compostable material** and can be composted in an industrial composting facility where temperature, light and humidity can be regulated.

# SOLO<sup>®</sup> rPET DELIGOURMET<sup>™</sup> FOOD CONTAINERS

Available in a variety of sizes, with one lid to fit all containers, these crystal clear DeliGourmet<sup>™</sup> containers from the Bare<sup>®</sup> by Solo<sup>®</sup> range are made using rPET, a robust and sustainable material. The premium containers provide perfect portion control and have a secure interchangeable lid, assuring they stay leak-resistant throughout transport.

Made from rPET (Polyethylene Terephthalate), a shatter-resistant and fully recyclable material

## Rolled Rim

Lid snaps into place and also provides strength to container

## Stacking Step

Allows for easy one-handed separation to increase operational efficiency

## Crystal Clear Sidewall

Enhances product visibility to increase impulse sales

## Large Custom Print Surface

Sidewall surface ideal for custom printing

## Combo Packs\* reduce inventory and save valuable back-of-house space!

The 217ml, 279ml and 374ml sizes are available in combo packs of 500 containers and lids. The larger 550ml and 700ml sizes are in combo packs of 300.

\*Containers and lids are in separate sleeves within the box.

Boxes of DeliLite<sup>®</sup> combo packs have a packaging configuration designed to optimise space efficiency when palletised. This may mean that there is some space within the box itself.

# WORDS, TERMS AND THEIR MEANINGS

Word / Term	What Does it Mean?
<b>Biodegradable</b>	When a product can degrade 'naturally' or decompose without causing harm. e.g. consumed by micro-organisms and returns to compounds found naturally. Not to be confused with 'compostable'.
<b>Compostable</b>	When a product requires a controlled environment in order to degrade (which typically takes 8 to 12 weeks), such as an industrial composting facility where temperature, light and humidity can be regulated. Compostability can be accredited by EN13432, ASTM 6868 or ASTM 6400. Please note: 'Biodegradable' products can be composted, but 'compostable' products will not necessarily biodegrade!
<b>Reusable</b>	A product that can be used again, without any alteration to its form e.g. a carrier bag.
<b>Recyclable</b>	A product that can be re-processed in order to produce a raw material, which can be used in the manufacture of completely new products.
<b>Recycled Content</b>	The type, or amount, of recycled material that has been used in the manufacture of a product.
<b>Post-Consumer Fibre (PCF)</b>	Paper fibre that can be used for the manufacture of new products, which has been collected, processed and turned into a raw material after a consumer has already used it e.g. clean paper fibres, office paper and paper cups.
<b>Polylactic Acid (PLA)</b>	A plant-based resin commonly derived from corn starch, but can also be derived from maize, sugar or wheat. PLA can be used to make clear tumblers, as well as being used as a coating on paper cups. PLA is a compostable material, requiring an industrial composting facility in which to degrade.
<b>Crystalline Polylactic Acid (CPLA)</b>	A crystalline form of PLA, described above, which has a high heat resistance and so is ideal for hot cup lids and cutlery.

## Do these words and terms apply to the Dart Products Europe range?

*When you need to know what category a particular product falls into, think of the material...*

Material	Sub-Type	Biodegradable	Compostable	Recycled Content	Recyclable
<b>Paper</b>	Single-Sided Poly (SSP)	No	No	No	No
	Double-Sided Poly (DSP)	No	No	No	No
	Post-Consumer Fibre (PCF) – Poly-Coated	No	No	✓Yes	No
	Post-Consumer Fibre (PCF) – PLA-Coated	No	✓Yes	✓Yes	No
	PLA-Coated	✓Yes	✓Yes	No	No
	Wax Treated	✓Yes	✓Yes	No	No
<b>Plastic</b>	Polyethylene Terephthalate (PET)	No	No	No	✓Yes
	Recycled PET (rPET)	No	No	✓Yes	✓Yes
	Polypropylene (PP)	No	No	No	No
	Polystyrene (PS)	No	No	No	No
	Oriented Polystyrene (OPS)	No	No	No	No
<b>Foam</b>	Expanded Polystyrene (EPS)	No	No	No	No
	Thin-Wall Foam	No	No	No	No
<b>Other</b>	Polylactic Acid (PLA)	No	✓Yes	No	No

# SYMBOLS AND THEIR MEANINGS

Symbol	What Does it Mean?	Which Products Does it Apply To?
<b>"Please Recycle"</b> 	Recycle Now is the national recycling campaign for England. This is one of the most commonly used symbols, and indicates a clear call to action. When this symbol appears, the product can be recycled after use where facilities are available	Products of all materials; as long as the product is recyclable, this logo can be used
<b>"Mobius Loop"</b> 	Used to show that a pack is recyclable. If a percentage is shown in the middle, that indicates the percentage of recycled content	Products of all materials; as long as the product is recyclable, this logo can be used
<b>British Retail Consortium</b> <i>Common Recycling Logo</i> 	Splits each component in a product's packaging into one of three categories, to improve recycling rates for mixed-material products	This logo illustrates which elements of the product can be recycled, and to what extent
<b>"Compostable"</b> 	The compostable 'seedling' logo denotes the packaging materials are suitable for composting	Products made of materials that can be composted in industrial facilities, and that meet the requirement of EN13432
<b>'Green Dot'</b> <i>AKA 'Der Grüne Punkt'</i> 	Originally launched in Germany, by paying a licence fee companies can display this logo on their packaging, which then exempts them from the German legal requirement to collect and recycle household packaging waste. Worldwide, the Green Dot logo is managed by PRO Europe on behalf of the various national Green Dot organisations across Europe	Products of all materials; as long as the product is recyclable, this logo can be used
<b>EU Eco-label</b> 	This logo means that the product has met all the environment and performance criteria set by the European Eco-label Board	Products of all materials; as long as the product is recyclable, this logo can be used. However, a licence must be granted by the European Eco-label Board
<b>Carbon Trust Label</b> 	The number of grams on the logo denotes the carbon footprint of the product, from source through to disposal. If the manufacturer fails to reduce the carbon footprint over a two year period, the label will be withdrawn	Products of all materials; recyclable or not, this logo can be used. However, a licence must be granted by the Carbon Trust
<b>PEFC</b> 	Programme for the Endorsement of Forest Certification is one of the world's largest forest certification systems. PEFC's credible standards seek to transform the way forests are managed globally and locally	Paper Hot Cup* customers have the option to add the PEFC logo to their artwork. The logo placement will need to be approved prior to production
<b>FSC</b> 	The Forest Stewardship Council (FSC) promotes environmentally appropriate, socially beneficial, and economically viable management of the world's forests	Flexstyle™ Food Container* customers have the option to have the FSC logo printed on their containers. The logo placement will need to be approved prior to production
<b>SFI</b> 	Sustainable Forestry Initiative is a management scheme across USA and Canada set up to responsibly manage forests and fibre sourcing. It is recognised by PEFC	All paper products manufactured in USA and Canada comply with this organisations requirements for Chain of Custody

\*Please note that the PEFC and FSC logos can only be added to UK produced Single Sided Paper Hot Cups and Flexstyle™ Food Containers.

## Where can more information be found?

There are several websites you can visit to find out more about materials, recycling and the environment. Here are a few that we recommend:

[www.wrap.org.uk](http://www.wrap.org.uk)

WRAP's vision is a world in which resources are used sustainably. By driving changes in areas such as food and drink, they are able to accelerate their mission of re-inventing how products are designed, produced and sold, influence the re-thinking of how we use and consume products, as well as re-define the possibilities of re-using and recycling. To find out more about WRAP and their mission you can visit their website.

[www.recyclenow.com](http://www.recyclenow.com)

Gives advice regarding how and where a wide variety of materials and products can be recycled in the UK.

A postcode search facility is available to find what services exist in your region.

[www.simplycups.co.uk](http://www.simplycups.co.uk)

Dart Products Europe is a founder member of Simply Cups, a scheme working towards solving the issue of recycling by providing cost-efficient collection and recycling for paper cup manufacturers, hospitality and beverage outlets, and those operating in the supply chain. The recycling process by Simply Cups means that they are able to separate the polyethylene lining from the paper layers of the cup; this then allows for the sourced materials to be recycled for a variety of uses. The Simply Cup's scheme also caters for the recycling of plastic cups made from polypropylene, PET and high impact polystyrene materials.

# EPS CUPS

Not only do EPS foam cups keep beverages at their optimal serving temperature on the inside, they keep hands comfortable on the outside. Hot or cold, the insulated foam delivers drinks the way they were meant to be. With a choice of ten lid styles there are solutions to suit every drinker's needs. Made by the experts, Dart Products Europe's EPS cups deliver on more than just quality.

## ONE PIECE CONSTRUCTION

### Print Capability

High quality printing surface enhancing the customer logo and message

### Flared Lip Design

Gives greater drinking comfort and enhances customer experience

### Foot Stack

Allows for easy one-handed separation

### *Voice of the Customer*

"EPS foam cups are perfect from season to season. The insulation of Dart Products Europe EPS cups mean that cold drinks stay cooler and hot drinks stay hotter for longer."

DART PRODUCTS EUROPE

# SOLO<sup>®</sup> MICROGOURMET<sup>™</sup> FOOD CONTAINERS

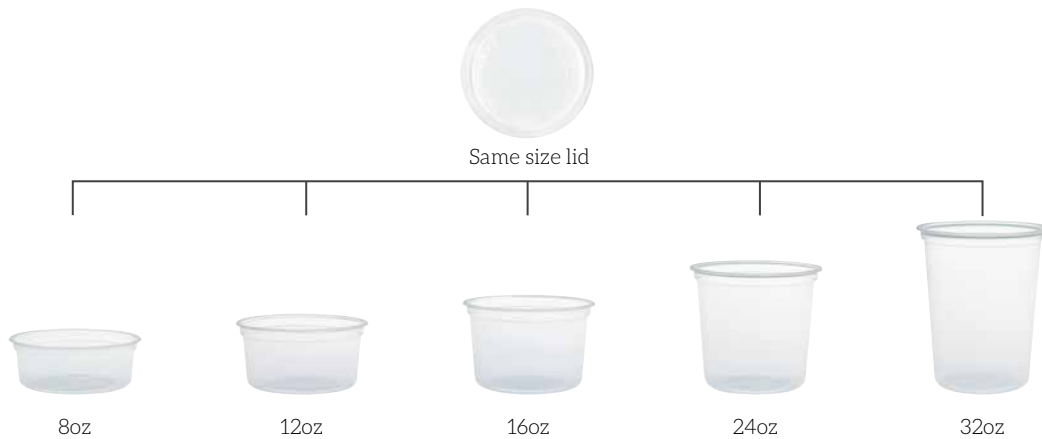

Busy operations will appreciate how this line allows pre-packaged foods to be refrigerated and microwave-heated in the same container. Five different container sizes use one common lid. You also get excellent contact clarity with our translucent containers.

<b>Material</b>	Polypropylene
<b>Sizes</b>	8–32oz (237–946ml)
<b>Colour / Design Options</b>	Translucent (Special prints are also available)
<b>Lid Options</b>	Recessed – Translucent (Special prints are also available)

# ONE LID SOLUTION

## Stacking Lugs

Aids in one-handed lid separation and stacking

## Recessed Lid

Tight inside fit keeps lid secure and gives a leak-resistant closure

## Voice of the Customer

“MicroGourmet™ containers make serving, heating, and eating hot food simple and mess-free.”

# EPS CONTAINERS & LIDS

The superior insulation of Dart Products Europe's EPS containers means they are ideal for foods such as soup, chilli and rice as well as cold food applications. The excellent lid fit means that foods can be hygienically and safely carried.

**ONE PIECE  
CONSTRUCTION**

#### **Lid Seat Line**

Ensures correct portion control which helps in controlling costs

#### **Lip**

Provides additional strength to container and a more secure lid fit

#### **Print Capability**

Allows for a high quality print surface which improves customer recognition

#### **Pedestal Base**

Gives a more stable container

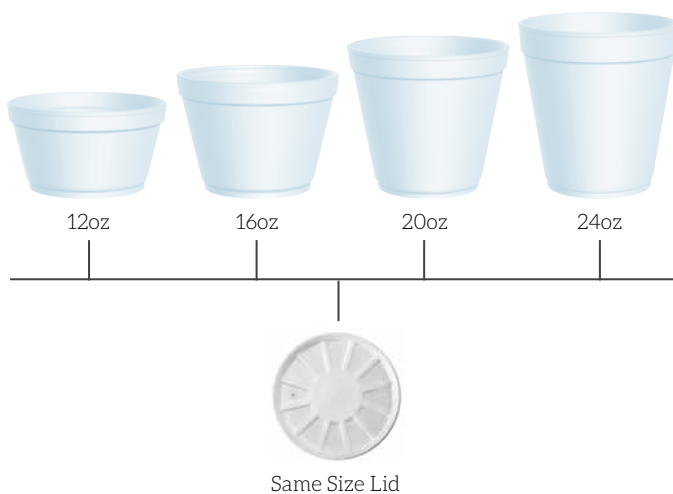

<b>Material</b>	Container: Expanded Polystyrene Lid: Polystyrene and Expanded Polystyrene
<b>Sizes</b>	2–24oz (59–710ml)
<b>Colour / Design Options</b>	White (Special prints are also available)
<b>Lid Options</b>	Multi-Vented, Dome Non-Vented, Foam Vented, High Dome, Non-Vented

## ONE LID SOLUTION

Mix and match lids between EPS cups and containers

### *Voice of the Customer*

“With Dart Products Europe’s EPS containers you have the option of a variety of lids, which means versatility is never a problem.”

# **Diner-Pak™** Containers & Lids

These rectangular containers are light but strong, enabling them to be stacked without crushing. Their firm fitting lids mean that foods can be carried safely without spillage. They can be used without lids, saving the cost of the lid when the food is to be eaten immediately.

Material	Expanded Polystyrene
Container Sizes	15–34oz (430–970ml)
Colour / Design Options	White
Lid Options	Rectangular Diner-Pak™ Lid

# PERSONALISED

# SHOW ME YOUR COLOURS

'Show Me Your Colours' is Dart Products Europe's bespoke print service, which enables you to have your own personalised range of complementary packaging.

This bespoke print service offers you the opportunity to have a consistent brand and colour theme throughout your packaging applications. Branding offers many advantages such as creating and retaining customer loyalty, giving a more professional appearance and enhancing the product itself and therefore improving profits.

Our Print and Pre-Press Department can offer help and advice regarding how to bring together your corporate identity with interesting imagery and design, to create an image unique to your business.

'Show Me Your Colours' is available in up to 8 colours (unless otherwise stated) for the following products:

## DRINKING ON THE GO

**Solo® Paper Hot Cups:** 4oz, 6oz, 8oz, 10oz, 12oz, 16oz & 20oz

# brand **BUILDER**

BrandBuilder® is a creative and mobile form of outdoor advertising ensuring consumers cannot miss your message. You are proud of what you serve, so put your name on it!

The BrandBuilder® service is for operators who require small quantities of bespoke printed hot cups and Flexstyle™ food containers.

Available in quantities of 5,000, 10,000 and 25,000 for the following products:

- Solo® paper hot cups in sizes 8oz, 12oz and 16oz printed in up to 8 colours
- Solo® Flexstyle™ paper food containers in sizes 12oz and 16oz printed in up to 6 colours

Typical lead time is 6 weeks from artwork approval.

# BESPOKE INNOVATION

Dart Products Europe prides itself on innovation and service, and our investment to develop our bespoke capabilities means that we can offer you a more tailor-made service and product offering than ever before.

From the first spark of an idea, through to concept development, prototyping and production, with the range of expertise we offer there's always someone to help get your vision off the ground.

## MATERIALS AND PROCESSES

We manufacture using a wide range of materials at both our site in Huntingdon and Cradley Heath. By using paper, foam, rPET, PET and polystyrene plastic, as well as processes such as injection moulding, thermoforming and printing, we are able to create high quality single-use packaging for a broad range of applications.

## INNOVATION

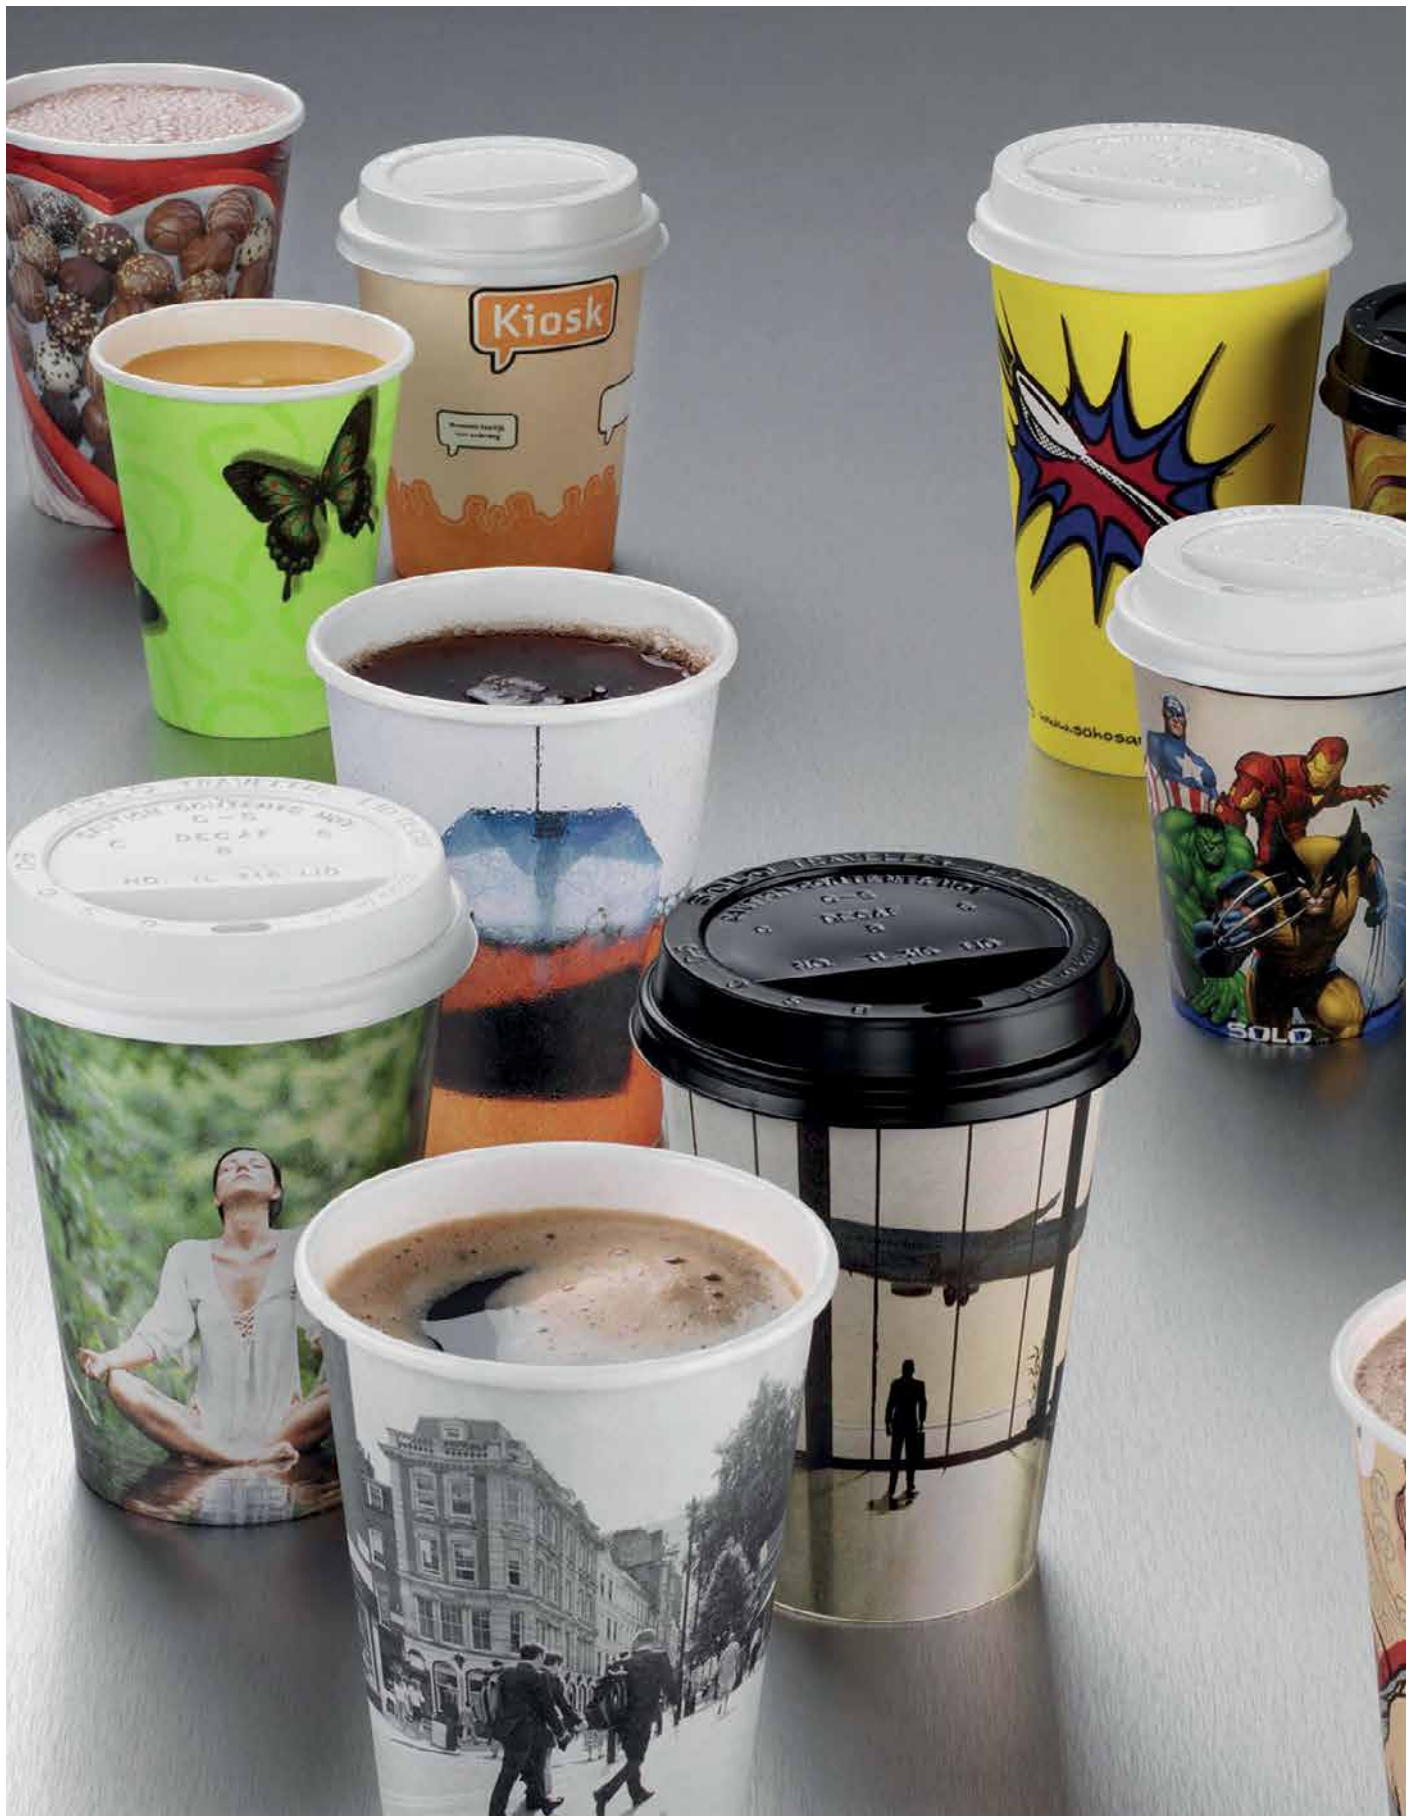

Our Innovation team, who are focused on finding the best materials, processes and designs to suit an application, are able to scope out possible single-use packaging solutions to suit your specific application and need.

## BESPOKE DESIGN

Where a new shape or design of product is required, the Technical Design team can offer advice and suggestions regarding the best materials and production tooling to use. As your concept is developed, the latest software is used to digitally draw-up and create your concept and prototypes can be made for your evaluation.
